SUMMARY

Curious and driven B.Tech Computer Science student with a strong interest in building real-world AI solutions. Experienced in Python, Machine Learning, and Natural Language Processing (NLP) through projects like a voice-enabled desktop assistant and a Fake News Prediction system. Skilled in Data Preprocessing, Model Training, Feature Engineering, and Text Classification using Pandas, NumPy, and Scikit-learn, along with Multithreading for efficient real-time task execution.

EDUCATION

B.Tech in Computer Science and Engineering 2022 – 2026 (Expected)
Ajay Kumar Garg Engineering College, Gaziabad.
Dr. A.P.J. Abdul Kalam Technical University, Uttar Pradesh, Lucknow

TECHNICAL SKILLS

Programming: Python, SQL, HTML
Data Science: NumPy, Pandas, Scikit-learn
Tools: Git, Jupyter, VS Code, GitHub, IntelliJ IDEA Ultimate

TECHNICAL PROJECTS

AI Desktop Virtual Assistant

- Designed and developed a Python-based AI Desktop Virtual Assistant integrating NLP-based voice command processing and multithreaded task execution for real-time system interaction.
- Designed a user-friendly GUI using Tkinter and integrated speech input/output using SpeechRecognition and pyttsx3.
- Ensured seamless real-time interactions by combining command parsing logic with multi-threaded response execution.

Tech Stack: Python, Tkinter, SpeechRecognition, pyttsx3, Webbrowser

Fake News Prediction System

- Developed a supervised Machine Learning model using Logistic Regression for text classification, achieving prediction accuracy through TF-IDF feature engineering and data preprocessing.
- Applied TF-IDF vectorization for converting textual data into numerical features.
- Achieved accurate predictions by training and evaluating the model on real-world news datasets.

Tech Stack: Python, Pandas, NumPy, re (Regex), Scikit-learn, Jupyter Notebook
